

# ELE523E Computational Nanoelectronics, Fall 2018

## Presentation Rules and Topics

### **RULES:**

- Each student makes his/her presentation in **25** minute time span, **20** minutes for the presentation and **5** minutes for the questions/comments.
- Presentation topics and corresponding papers are listed below. The presentations should be mainly constructed on the listed papers; however it is encouraged to use/refer other papers and sources.
- Students should decide their presentation during the lecture time on **10/12/2018**.
- All students, not just the presenter, are expected to read the related papers before presentations. Students are expected to ask (tough☺) questions to the presenter.
- Students are graded considering the presentation **clarity/quality** and also the presenter's **knowledge** on the topic.
